

## About Telephonics

Telephonics is a locally owned and operated company which was formed in February 1995. Our technical staff specialise in meeting the needs of each individual client.

Telephonics was formed with the idea to provide customers within the central region with a top-quality service at an affordable price. Clients can feel safe in the knowledge that their value as a customer is important to us whether we are tendering for a large project or installing a single jack-point into your office. The corner stone of Telephonics is, and always will be, a quality, reliable, fast and friendly service.

In the case of servicing companies with multiple locations throughout New Zealand, Telephonics holds the support of a nationwide network of independent dealers, which means no installation or cabling job is too big. Our local customers have peace of mind with our 24/7 call out service with a response time of less than 4 hours guaranteed.

## About Grandstream Networks

Grandstream Networks, Inc. has been connecting the world since 2002 with SIP Unified Communications solutions that allow businesses to be more productive than ever before. Their award-winning solutions serve the small and medium business and enterprise markets and have been recognized throughout the world for their quality, reliability and innovation. Grandstream solutions lower communication costs, increase security protection and enhance productivity. The open standard SIP-based products offer broad interoperability throughout the industry, along with unrivaled features, flexibility and price competitiveness.

## Why Do I Need Grandstream Wireless Network Solution?

Wireless devices are increasing in the workplace and home and this has created a demand for flexible, reliable and fast wireless solutions.

A Grandstream network can offer you the connection you require. The Grandstream system will enable users to roam without losing connection while working on multiple devices and without the effort and cost required to run cables and wires. Companies can take control of their wireless with the Grandstream bank grade security cloud based management system with no limits or annual costs.

## GWN Cloud Management

GWN.Cloud is an enterprise-grade, management platform for Grandstream GWN series of WiFi access points. Thanks to streamlined monitoring and maintenance, managing your network across multiple locations has never been easier. Keep an eye on the network's performance with real-time monitoring, alerts, statistics and reports that can be viewed using a web browser or the mobile application. GWN.Cloud offers a centralized WiFi network management platform for an entire enterprise, not just a single site. It features complete scalability with no limits on the number of sites or APs accessed from anywhere via the web or mobile app.

## Network Cameras

Ideal for the small-to-medium business, retail, education, hospitality and medical markets, the GWN7000 supports comprehensive WiFi and VPN solutions that can be shared across one or many different physical locations.

- 7 Gigabit ports (2 WAN + 5 LAN)
- Hardware accelerated VPN including PPTP, L2TP/ IPSec and OpenVPN
- Embedded controller to manage 300+ GWN WiFi APs
- Multi WAN ports with load balancing and failover to maximize connection reliability
- Intuitive Web interface to centrally monitor/provision the entire network
- 1 million packets/ second routing & 10Gbps aggregate switching power

## GWN7630

The GWN7630 is a high-performance 802.11ac Wave-2 Wi-Fi access point for small to medium sized businesses, multiple floor offices, commercial locations and branch offices. It offers dual-band 4x4:4 MU-MIMO technology and a sophisticated antenna design for maximum network throughput and expanded Wi-Fi coverage range.

## GWN 7600

Designed for small to medium sized businesses, multiple floor offices, commercial locations and branch offices, the GWN7600 is a mid-tier 802.11ac Wave-2 WiFi access point. It supports up to 1.27Gbps, over 450 concurrent WiFi clients and up to a 165 meter coverage range. To ensure easy installation and management, the GWN7600 uses a controller-less distributed network management design in which the controller is embedded within the product's web user interface.

## Grandstream Video Conferencing

Powerful on-premise video conferencing server designed for modern enterprise collaborations. It offers a state-of-the-art platform that provides a superior user experience and rich collaboration features including audio/video conferencing, screen/application sharing, and group/private chats. featuring advanced meeting control tools, flexible customization options, and supports access from a variety of devices including video conferencing room systems, video phones, PC/Mac, Android/iOS mobile devices
