

About Telephonics

Telephonics is a locally owned and operated company which was formed in February 1995. Our technical staff specialise in meeting the needs of each individual client.

Telephonics was formed with the idea to provide customers within the central region with a top-quality service at an affordable price. Clients can feel safe in the knowledge that their value as a customer is important to us whether we are tendering for a large project or installing a single jack-point into your office. The corner stone of Telephonics is, and always will be, a quality, reliable, fast and friendly service.

In the case of servicing companies with multiple locations throughout New Zealand, Telephonics holds the support of a nationwide network of independent dealers, which means no installation or cabling job is too big. Our local customers have peace of mind with our 24/7 call out service with a response time of less than 4 hours guaranteed.

About Dahua CCTV Systems

Dahua Technology is a world-leading video-centric smart IoT solution and service provider. Based on technological innovations, Dahua Technology offers end-to-end security solutions, systems, and services to create values for city operations, corporate management, and consumers.

Dahua Technology has solutions, products, and services applied in 180 countries and regions. Committed to the mission of "Enabling a safer society and smarter living", Dahua Technology will adhere to its core value of being "customer-centered," in order to provide the market with excellent quality and service, to create more value for customers, and make unremitting efforts to build a safe, intelligent, convenient and efficient society.

What CCTV solution is best for me?

If you've ever browsed through CCTV surveillance camera brochures with their dozens of options, product shots, specifications and varying prices, you may feel overwhelmed by the choice.

Telephonics will eliminate the worry. We have the experience and knowledge to deliver the solutions to protect a wide range of premises and sites, so you get the right equipment the first time. We will work with you to find the answers to your questions about focus, deterrence, recognition, footage and quality.

CCTV Recorders

NVR & HDCVI (High Definition Composite Video Interface), Dahua recorders offer the best performance and highest quality.

Software and Mobile

Software and Mobile apps to monitor and receive notifications, camera administration, you can even move the PTZ cameras, and speak via a mobile through the speakers of the cameras.

Network Cameras

Network cameras are widely used in various applications and vertical industries. Face Recognition cameras can be used in entrance & exit, smart retail, public areas, and other scenarios to improve operation efficiency.

HDCVI Cameras

Dahua HDCVI cameras with project-oriented features to a cost/performance balance. Users can select cameras based on their needs. HDCVI cameras are used in applications where existing analog infrastructure is available.

Alarms

Alarms are an important component in keeping your house and premises safe. Dahua offers both wireless and wired alarm systems. Wireless alarm products offer a complete solution via mobile app.

PTZ Cameras

PTZ cameras use pan, tilt, and zoom functionality to provide both wide-area coverage and greater detail. Specialized cameras, like positioning systems, anti-corrosion cameras, and explosion-proof cameras are also available for user special applications.

Thermal Cameras

Thermal cameras, which do not require a light source, are excellent for providing enhanced coverage in diverse environments, such as those with harsh conditions or extreme darkness. They have detection and temperature measurement capabilities.

Video Intercoms

Dahua's Video Intercom product lineup eases communications between visitors, homeowners, and property management centers.
